# JUNHAO WANG

(+1) 213·245·0651 ♦ junhaowanggg@gmail.com ♦ github.com/forkercat ♦ junhaow.com ♦ Irvine, CA

#### **EDUCATION**

University of Southern California (USC), Los Angeles, CAAug. 2019 - May. 2021Master of Science in Computer ScienceGPA: 3.90 / 4.0Israel Institute of Technology (Technion), Haifa, IsraelJul. 2017 - Aug. 2017Summer Program of Machine LearningTop 15%Shantou University (STU), ChinaSep. 2014 - Jun. 2018

#### **WORK EXPERIENCE**

#### **Software Engineer II, Game Tech, Amazon Web Services** [C++, C#, Python]

Jun. 2022 - Present

GPA: 3.74 / 4.0 (Top 2%)

Open 3D Engine (O3DE) - GitHub repo & Contribution history

Bachelor of Engineering in Computer Science

- Published 70+ pull requests to O3DE repositories, reviewed 140+ pull requests from peers, and created 40+ GitHub issues
- Improved and optimized Prefab system for building game objects in large scenes and refactored undo/redo editor workflows
- Developed Prefab Override features and added visualization in Entity Outliner and Inspector to enable users editing overrides
- Contributed to a new <u>Prefab Developer Documentation</u> for the Discord community to learn about how to develop the system Amazon GameLift Plugins for Unity and Unreal Engine - <u>GitHub repo</u>
- Developed a Unity plugin that helps customers to easily integrate their games with session-based multiplayer servers
- Created an open-source Unreal plugin for customers to test and deploy their games with GameLift in a step-by-step manner

# **Software Engineer I, Alexa Speech Recognition, Amazon** [Java, Python]

Jul. 2021 - Jun. 2022

- Worked on a high-TPS AWS service that processes real-time contextual dialog data to improve recognition accuracy by 10%
- Collaborated with research scientists to design and build experimental tools to test and evaluate contextual dialog models

#### Course Grader (Volunteer), GAMES 101: Introduction to Computer Graphics [C++]

Jun. 2021 - Nov. 2021

Organized the graphics course in Spring 2021, scheduled meetings, and graded assignments and projects for students

# **Team Leader & iOS Developer, Campus App at STU** [Objective-C] - <u>Team & App</u>

Oct. 2015 - Aug. 2017

- Created an iOS campus app in two months and released 14 versions on App Store with a 4.7 / 5.0 rating and 15,000+ users
- Ranked 7<sup>th</sup> out of 300+ apps in the First China iOS App Development Competition in 2017

#### **GRAPHICS & GAME PROJECTS**

# Palico Engine: Metal-Based Game Engine [Swift, Metal] - GitHub repo & Screenshot

Dec. 2021 - Jan. 2022

- Developed a small game engine application with Metal API and Cocoa that supports multiple layers, event system, and editor
- Built UI with ImGui and contributed to open-source project SwiftImGui by converting the latest macOS backend to Swift (<u>PR</u>)
- Created a renderer encapsulating command encoders and pipeline states and a shader library that complies MSL shaders
- Made an entity component system MothECS that manages entities and components with bitmasks and supports view operation

# Forker Renderer: CPU-Based Rasterizer [C++, CMake] - GitHub repo & Results

Dec. 2020 - Jul. 2021

- Achieved Blinn-Phong and PBR (Cook-Torrance BRDF) shading as well as texture mapping with wrapping and filtering modes
- Included perspective / orthographic projections in camera model and achieved Perspective-Correct Interpolation
- Enabled soft shadow effect in shadow pass using PCF-based Percentage-Closer Soft Shadow (PCSS) algorithm
- Built G-buffers that support Screen-Space Ambient Occlusion (SSAO) with noise reduction filter (two-pass Gaussian blur)

#### Plan Odyssey: 3D Exploration Unity Game [C#, HLSL, Collaborate] - <u>Game trailer</u> & <u>Presentation</u>

Jan. 2021 - Apr. 2021

- Collaborated with two students on a sci-fi exploration game where players play as astronauts to explore outland planets
- Implemented smooth player control, Cinemachine cameras, walk and jump animations, jetpack system with particle effect
- Practiced HLSL shaders under Universal Render Pipeline and made topographic scanner and volumetric light cone effect
- Learned compute shader techniques and achieved beautiful large-scale grass without noticeable FPS drop (blog post)

# **TECHNICAL SKILLS**

Programming Languages
Tools & Frameworks
Relevant Courses

C/C++, C# (.NET), Swift, Java, Python, Objective-C, MSL, GLSL, MATLAB Visual Studio, CLion, Emacs, Unreal Engine (Blueprint), Unity, Metal, OpenGL, ImGui, CMake Data Structures, Algorithms, Computer Graphics, High Quality Real-Time Rendering
